

## LAB-AIDS Correlations for

### DISTRICT OF COLUMBIA PUBLIC SCHOOLS

#### Middle School (6---8) Science Scope and Sequence for the Next Generation Science Standards

*Oralia Gil, Curriculum Specialist, LAB-AIDS*

*Mark Koker, Ph D, Director of Curriculum & Professional Development, LAB-AIDS*

This document is intended to show how our SEPUP curriculum products align with the DCPS Middle School Scope and Sequence for *Next Generation Science Standards*<sup>1</sup> and Common Core documents. SEPUP project staff provided information that was very helpful in our production of this document, but LAB-AIDS takes sole responsibility for its content and final appearance.

#### ABOUT OUR PROGRAMS

LAB-AIDS Core Science Programs are developed to support current knowledge on the teaching and learning of science. All materials support an inquiry-driven pedagogy, with support for literacy skill development and with assessment programs that clearly show what students know and are able to do from using the programs. All programs have extensive support for technology in the school science classrooms, and feature comprehensive teacher support. For more information please visit [www.lab-aids.com](http://www.lab-aids.com) and navigate to the program of interest.

#### SEPUP

Materials from the Science Education for Public Understanding Program (SEPUP) are developed at the Lawrence Hall of Science, at the University of California, Berkeley, and distributed nationally by LAB-AIDS, Inc. Development of SEPUP materials is supported by grants from the National Science Foundation. SEPUP programs are available as full year courses, or separately, as units, each taking 3-9 weeks to complete, as listed below.

*Middle Level, Grades 6-8*

#### ***Issues and Earth Science, Second Edition (IAES)***

<b>Unit Title</b>	<b>Activity Number</b>
Studying Soil Scientifically	1-11
Rocks and Minerals	12-23
Erosion and Deposition	24-35

---

<sup>1</sup> <http://www.nextgenscience.org/next-generation-science-standards>

Plate Tectonics	36-49
Weather and Atmosphere	50-70
The Earth in Space	71-84
Exploring Space	85-98

***Issues and Life Science, Second Edition (IALS)***

<b>Unit Title</b>	<b>Activity Number</b>
Experimental Design: Studying People Scientifically	1-10
Body Works	11-29
Cell Biology and Disease	30-53
Genetics	54-71
Ecology	72-88
Evolution	89-101
Bioengineering	102-109

***Issues and Physical Science, Second Edition (IAPS)***

<b>Unit Title</b>	<b>Activity Number</b>
Studying Materials Scientifically	1-11
The Chemistry of Materials	12-29
Water	30-52
Energy	53-72
Force and Motion	73-88
Waves	89-99

Each of the full year programs begins with a “starter” unit sequence on the scientific method in the context of each particular discipline. For example, the Issues and Life Science (IALS) course contains a ten- activity unit called “Experimental Design: Studying People Scientifically,” which uses the science behind clinical trials on human subjects, to frame the study of the life sciences. These are listed first in each course.

**ABOUT THE NEXT GENERATION SCIENCE STANDARDS**

The National Academy of Sciences, Achieve, the American Association for the Advancement of Science, and the National Science Teachers Association have collaborated over several years to develop the *Next Generation Science Standards* (NGSS). The first step of the process was led by The National Academies of Science, a non-governmental organization commissioned in 1863 to advise the nation on scientific and engineering issues. On July 19, 2011, the National Research Council (NRC), the functional staffing arm of the National Academy of Sciences, released the *Framework for K-12 Science Education*.

The *Framework* was a critical first step because it is grounded in the most current research on science and science learning and it identifies the science all K–12 students should know. The second step in the process was the development of standards grounded in the NRC Framework. A group of 26 lead states and writers, in a process managed by Achieve, has been working since the release of the Framework to develop K-12 *Next Generation Science Standards*. The *Standards* have undergone numerous lead states and all state reviews as well as two public comment periods, the most recent of these in January, 2013. The final release of the Standards coincided with the National Conference of the National Science Teachers Association Annual Conference in San Antonio, TX, the week of April 8, 2013.

The *Next Generation Science Standards* (NGSS) provide an important opportunity to improve not only science education but also student achievement. Based on the *Framework for K–12 Science Education*, the NGSS are intended to reflect a new vision for American science education. *The Next Generation Science Standards* are student performance expectations – NOT curriculum. Even though within each performance expectation Science and Engineering Practices (SEP) are partnered with a particular Disciplinary Core Idea (DCI) and Crosscutting Concept (CC) in the NGSS, these intersections do not predetermine how the three are linked in curriculum, units, or lessons. Performance expectations simply clarify the expectations of what students will know and be able to do by the end of the grade or grade band.

As the reader knows, the *Standards* represent content from several domains: (1) science and engineering practices; (2) cross-cutting concepts; (3) the disciplines of life, earth, and physical science, as set forth in the *Next Generation Science Framework* (NRC, 2012). The Standards themselves are written as performance indicators, and content from the Common Core (<http://www.corestandards.org/>) is included. The following middle level standard from the life sciences is used to show the basic structure. Standards, as performance indicators, are in the white box on top, and the relevant Practices, Disciplinary Core Ideas, and Crosscutting Concepts are listed below in the blue, orange, and green boxes, respectively. Clarification Statements, in red, list assessment boundaries or further describe the standard; statements marked with an asterisk (\*) denote integration of engineering content.

### MS-LS3 Heredity: Inheritance and Variation of Traits

MS-LS3 Heredity: Inheritance and Variation of Traits		
<p>Students who demonstrate understanding can:</p> <p><b>MS-LS3-1. Develop and use a model to describe why structural changes to genes (mutations) located on chromosomes may affect proteins and may result in harmful, beneficial, or neutral effects to the structure and function of the organism.</b> [Clarification Statement: Emphasis is on conceptual understanding that changes in genetic material may result in making different proteins.] [Assessment Boundary: Assessment does not include specific changes at the molecular level, mechanisms for protein synthesis, or specific types of mutations.]</p> <p><b>MS-LS3-2. Develop and use a model to describe why asexual reproduction results in offspring with identical genetic information and sexual reproduction results in offspring with genetic variation.</b> [Clarification Statement: Emphasis is on using models such as Punnett squares, diagrams, and simulations to describe the cause and effect relationship of gene transmission from parent(s) to offspring and resulting genetic variation.]</p> <p>The performance expectations above were developed using the following elements from the NRC document <i>A Framework for K-12 Science Education</i>.</p>		
<p><b>Science and Engineering Practices</b></p> <p><b>Developing and Using Models</b> Modeling in 6–8 builds on K–5 experiences and progresses to developing, using, and revising models to describe, test, and predict more abstract phenomena and design systems.</p> <ul style="list-style-type: none"> <li>Develop and use a model to describe phenomena. (MS-LS3-1),(MS-LS3-2)</li> </ul>	<p><b>Disciplinary Core Ideas</b></p> <p><b>LS1.B: Growth and Development of Organisms</b></p> <ul style="list-style-type: none"> <li>Organisms reproduce, either sexually or asexually, and transfer their genetic information to their offspring. (<i>Secondary to MS-LS3-2</i>)</li> </ul> <p><b>LS3.A: Inheritance of Traits</b></p> <ul style="list-style-type: none"> <li>Genes are located in the chromosomes of cells, with each chromosome pair containing two variants of each of many distinct genes. Each distinct gene chiefly controls the production of specific proteins, which in turn affects the traits of the individual. Changes (mutations) to genes can result in changes to proteins, which can affect the structures and functions of the organism and thereby change traits. (MS-LS3-1)</li> <li>Variations of inherited traits between parent and offspring arise from genetic differences that result from the subset of chromosomes (and therefore genes) inherited. (MS-LS3-2)</li> </ul> <p><b>LS3.B: Variation of Traits</b></p> <ul style="list-style-type: none"> <li>In sexually reproducing organisms, each parent contributes half of the genes acquired (at random) by the offspring. Individuals have two of each chromosome and hence two alleles of each gene, one acquired from each parent. These versions may be identical or may differ from each other. (MS-LS3-2)</li> <li>In addition to variations that arise from sexual reproduction, genetic information can be altered because of mutations. Though rare, mutations may result in changes to the structure and function of proteins. Some changes are beneficial, others harmful, and some neutral to the organism. (MS-LS3-1)</li> </ul>	<p><b>Crosscutting Concepts</b></p> <p><b>Cause and Effect</b></p> <ul style="list-style-type: none"> <li>Cause and effect relationships may be used to predict phenomena in natural systems. (MS-LS3-2)</li> </ul> <p><b>Structure and Function</b></p> <ul style="list-style-type: none"> <li>Complex and microscopic structures and systems can be visualized, modeled, and used to describe how their function depends on the shapes, composition, and relationships among its parts, therefore complex natural structures/systems can be analyzed to determine how they function. (MS-LS3-1)</li> </ul>
<p><i>Connections to other DCIs in this grade-band:</i> <b>MS.LS1.A</b> (MS-LS3-1); <b>MS.LS4.A</b> (MS-LS3-1)</p> <p><i>Articulation across grade-bands:</i> <b>3.LS3.A</b> (MS-LS3-1),(MS-LS3-2); <b>3.LS3.B</b> (MS-LS3-1),(MS-LS3-2); <b>HS.LS1.A</b> (MS-LS3-1); <b>HS.LS1.B</b> (MS-LS3-1),(MS-LS3-2); <b>HS.LS3.A</b> (MS-LS3-1),(MS-LS3-2); <b>HS.LS3.B</b> (MS-LS3-1),(MS-LS3-2)</p> <p><i>Common Core State Standards Connections:</i> ELA/Literacy –</p>		

Various other appendices describe other important elements of the Standards, such as DCI progressions, STS, nature of science, and more.

## ABOUT THE LAB-AIDS CITATIONS

The following tables are presented in a DCPS sequence. This document is intended as a summary document to show the NGSS and Common Core ELA/Math alignment as of January 2015, and is based on input from the SEPUP staff. As of this writing, SEPUP has plans to post more details on their own internal NGSS review and alignment process on their project website ([www.sepuplhs.org](http://www.sepuplhs.org)) later in 2015. In addition, not all SEPUP 6-8 units listed on pages 1-2 may appear here, as some may contain science content that falls outside NGSS specifications.

*Citations included in the correlation document are as follows:*

Unit title, Activity Number and Description:

The Chemistry of Materials, 14 LABORATORY Physical and Chemical Properties of Materials  
Students test and group 6 different materials based on their chemical and physical properties.

NGSS Performance Expectations	MS-PS1-2
Science and Engineering Practices	Planning and Carrying Out Investigations (Structure and Function)*
Crosscutting Concepts	
Disciplinary Core Ideas	PS1.A
Common Core English-Language Arts	RST.6-8.3
Common Core Mathematics	

\*The use of parenthesis ( ) indicates partial coverage.

## DCPS Science Scope and Sequence

### Middle School Earth Science (**Grade 6**) Overview and Scope and Sequence SY14---15

Advisory	Units	SEPUP Units	Performance Expectation	Disciplinary Core Idea
Advisory 1	Unit 1: Time and Size --- The Universe Unit 2: Earth's Location--- Solar System and Milky Way Galaxy Unit 3: Earth and Moon Movement--- Eclipses, Phases, Tides and Seasons	Exploring Space	(MS-ESS1-2) MS-ESS1-3	(ESS1.A) ESS1.B
		Earth in Space	MS-ESS1-1	ESS1.A ESS1.B
Advisory 2	Unit 4: Heat Transfer, Oceans and Climate Unit 5: Human Impact and Climate Change	Rocks and Minerals	(MS-ESS1-4) MS-ESS2-1	(ESS1.C) (ESS2.A) (ESS3.A)
		Weather and Atmosphere	MS-ESS2-4	ESS2.C
			MS-ESS2-5 MS-ESS2-6	ESS2.D (ESS3.C)
Advisory 3	Unit 6: Weather Unit 7: Our Region's Landscape and Human Impact	Weather and Atmosphere	MS-ESS2-4	ESS2.C
			MS-ESS2-5	ESS2.D
			MS-ESS2-6	(ESS3.C)
Advisory 4	Unit 8: Volcanoes and Earthquakes Unit 9: Fossils and Geology Identification, Formation and Age	Erosion and Deposition	MS-ESS2-2	ESS2.C (ESS3.B)
		Plate Tectonics	MS-ESS1-4	(ESS1.C)
			MS-ESS2-1	(ESS2.A)
			MS-ESS2-2 MS-ESS2-3	ESS2.B (ESS3.B)

The following are currently not addressed: MS-ESS3-1, MS-ESS3-2, MS-ESS3-3, MS-ESS3-4, MS-ESS3-5.

### Middle School Life Science (**Grade 7**) Overview and Scope and Sequence SY14---15

Advisory	Units	SEPUP Unit	Performance Expectation	Disciplinary Core Idea
Advisory 1	Unit 1: Cells Unit 2: Human Body Systems	Cell Biology and Disease	MS-LS1-1 MS-LS1-2 MS-LS1-3 MS-LS1-7	LS1.A LS1.C (PS3.D)
		Body Works	MS-LS1-7 MS-LS1-3	LS1.A LS1.C PS3.D
Advisory 2	Unit 3: Reproduction Unit 4: Heredity	Genetics	MS-LS1-5	LS1.B
			MS-LS3-1	LS3.A

Advisory	Units	SEPUP Unit	Performance Expectation	Disciplinary Core Idea
			MS-LS3-2 MS-LS4-5	LS3.B
Advisory 3	Unit 5: History of Life on Earth Unit 6: Evolution	Evolution	MS-LS4-1 MS-LS4-2 MS-LS4-4 MS-LS4-5 MS-LS4-6	LS3.B LS4.A LS4.B LS4.C
Advisory 4	Unit 7: Ecology	Ecology	MS-LS1-6 MS-LS1-7 MS-LS2-1 MS-LS2-2 MS-LS2-3 MS-LS2-4 MS-LS2-5	LS1.A LS1.C LS2.A LS2.B LS2.C LS4.D

The following are currently not addressed: MS-LS1-4, MS-LS1-8, MS-LS4-3.

### Middle School Physical Science (Grade 8) Overview and Scope and Sequence SY14---15

Advisory	Units	SEPUP Unit	Performance Expectation	Disciplinary Core Idea
Advisory 1	Unit 1: Energy and Interactions	Energy	(MS-PS2-5) MS-PS3-2 MS-PS3-3 MS-PS3-4 MS-PS3-5	PS2.B PS3.A PS3.B PS3.C ETS1.A ETS1.C
Advisory 2	Unit 2: Forces and Interactions Unit 3: Structure of Matter	Force and Motion	(MS-PS2-1)	PS2.A PS3.C ETS1.A ETS1.C
Advisory 3	Unit 4: Matter and Interactions	The Chemistry of Materials	MS-PS1-1 MS-PS1-2 MS-PS1-3 MS-PS1-5	PS1.A PS1.B
Advisory 4	Unit 5: Waves and Interactions	Waves	(MS-PS4-1) (MS-PS4-2)	PS4.A PS4.B

The following are currently not addressed: MS-PS1-4, MS-PS1-6, MS-PS2-2, MS-PS2-3, MS-PS2-4, MS-PS3-1, MS-PS4-3.

6<sup>th</sup> Grade    Advisory 1

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Exploring Space</b>					
85 INVESTIGATION: History of Space Exploration Students are introduced to the history of space exploration and share their knowledge of the solar system.			Patterns  Influence of Engineering, Technology, and Science on Society and the Natural World		
86 INVESTIGATION: Observing Objects in Space Students observe photographs to help identify planets and stars. They are encouraged to make their own observations outside.				(ESS1.A)	
87 READING: Telescope Technology Students read about the development of the modern telescope. The work of famous astronomers Galileo, Hale, Leavitt, and Hubble are highlighted.			Influence of Engineering, Technology, and Science on Society and the Natural World		RST.6-8.1
88 INVESTIGATION: Classifying Space Objects Students learn to identify and classify celestial bodies based on their characteristics.		Constructing Explanations and Designing Solutions  Engaging in Argument from Evidence		(ESS1.A) ESS1.B	WHST.6-8.1
89 INVESTIGATION: Where in the Solar System Am I? Students use descriptions of planets' characteristic to identify four different planets presented in a science-fiction scenario.				(ESS1.A) (ESS1.B)	(WHST.6-8.2)  MATH: 6.NS.C.5
90 MODELING: Drawing the Solar System Students use a scale to make an accurate drawing	MS-ESS1-3	Developing and Using Models	Scale, Proportion, and Quantity	(ESS1.A) ESS1.B	MATH: (MP.4); (6.RP.A.1); (7.RP.A.2);

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Exploring Space</b>					
of distances to the planets. They investigate the problem of using the same scale when drawing the distance to and diameter of the planets.		Analyzing and Interpreting Data	Systems and System Models		MP.2
91 PROJECT: How Big Are the Planets? Students determine a scale for modeling the size of the planets and then make a physical model that compares the planets.	MS-ESS1-3	Developing and Using Models  Analyzing and Interpreting Data  Constructing Explanations and Designing Solutions	Scale, Proportion, and Quantity  Systems and System Models	ESS1.B	MATH: (MP.4); (6.RP.A.1); (7.RP.A.2); MP.2
92 READING: The Nearest Star: the Sun Students read about characteristics of the Sun such as its size, distance, composition, and its place as a star in the solar system.		Engaging in Argument from Evidence		(ESS1.A) ESS1.B	RST.6-8.1; RST.6-8.7; WHST.6-8.9; WHST.6-8.1
93 LABORATORY : Picturing Without Seeing Students use measuring probes to make a remote sensing image of an unseen planetary surface. This measuring-and mapping technique is then related to applications in space science.		Developing and Using Models  Planning and Carrying Out Investigations	Systems and System Models		MATH: (6.RP.A.1); (7.RP.A.2); MP.2
94 INVESTIGATION: Remote Sensing Students apply knowledge of remote sensing and planetary characteristics to observing and comparing remote sensing images of the surface technology of three planets.		Analyzing and Interpreting Data	Interdependence of Science, Engineering, and Technology		
95 INVESTIGATION: Universal Gravitation Students analyze data of gravitational pull between space objects. Mass and distance are related to the force of gravity.	(MS-ESS1-2)	Constructing Explanations and Designing Solutions  Engaging in Argument from Evidence	Systems and System Models  Patterns  Cause and Effect	ESS1.B	WHST.6-8.1  MATH: MP.2

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Exploring Space</b>					
96 READING: The Effects of Gravity Students read a summary about universal gravitation and are introduced to how gravity is related to weight, weightlessness, and orbiting objects.	(MS-ESS1-2)	Constructing Explanations and Designing Solutions	Systems and System Models  Cause and Effect	ESS1.B	RST.6-8.1  MATH: MP.2
97 ROLE PLAY: Exploring Outer Space Students participate in a role-play that discusses the advantages and disadvantages of piloted and unpiloted space missions.			(Interdependence of Science, Engineering, and Technology)		
98 TALKING IT OVER: Choosing a Mission Students consider the benefits and trade-offs of four different space exploration proposals and make a recommendation of which one to fund.		(Analyzing and Interpreting Data)  (Asking Questions and Defining Problems)			(SL.8.5)

DRAFT

**Grade 6      Advisory 1**

<b>SEPUP Unit: Activity</b>	<b>Performance Expectation</b>	<b>Practices</b>	<b>Crosscutting Concepts</b>	<b>Disciplinary Core Ideas</b>	<b>Common Core ELA/Mathematics</b>
<b>Earth in Space</b>					
71 TALKING IT OVER: Sunlight and Shadows Students read about, and propose explanations for, the changing positions of the shadow from a tree over a day. They also critique a fictional student’s notebook.		Constructing Explanations and Designing Solutions	Systems and System Models  Cause and Effect  Patterns	(ESS1.A) (ESS1.B)	
72 INVESTIGATION: Measuring Shadows, Measuring Time Students design an investigation to observe changing shadows during the day. As an extension, they observe the shadows over several weeks.	MS-ESS1-1	Constructing Explanations and Designing Solutions  Planning and Carrying Out Investigations	Patterns  Systems and System Models  Cause and Effect	(ESS1.B)	
73 MODELING: A Day on Earth Students propose an explanation for night and day and view a model of Earth’s rotation.	MS-ESS1-1		Cause and Effect  Systems and System Models	(ESS1.A) (ESS1.B)	
74 READING: As Earth Rotates Students complete a reading about Earth’s rotation, day–night cycle, and time.	MS-ESS1-1		Systems and System Models  Cause and Effect  Interdependence of Science, Engineering, and Technology	ESS1.A (ESS1.B)	RST.6-8.7; (RST.6-8.9)
75 INVESTIGATION: Sunlight and Seasons Students graph data on the length of daylight and highest angle of the Sun for the 21st of each month and correlate changes in the Sun’s position and day length with the seasons.	MS-ESS1-1	Analyzing and Interpreting Data	Patterns  Systems and System Models  Cause and Effect	(ESS1.A) ESS1.B	(RST.6-8.9)  MATH: MP.4; MP.2

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Earth in Space</b>					
76 COMPUTER SIMULATION: A Year Seen From Space Students use observations of Earth's position relative to the Sun over a year to develop an explanation of the basis for Earth's year and seasons.	MS-ESS1-1	Developing and Using Models  Constructing Explanations and Designing Solutions	Patterns  Systems and System Models  Scale, Proportion, and Quantity  Cause and Effect	ESS1.A ESS1.B	(RST.6-8.9)
77 MODELING: Explaining the Seasons Students explore the effects of direct and indirect sunlight on the solar energy striking Earth's surface. They learn that the directness of the Sun's rays is one of two factors that result in hotter summers.	MS-ESS1-1	Constructing Explanations and Designing Solutions	Systems and System Models  Cause and Effect	(ESS1.A) ESS1.B	(RST.6-8.9)
78 READING: The Earth on the Move Students read about Earth's tilt and its effects on the light hitting Earth and on seasons.	MS-ESS1-1	Developing and Using Models	Systems and System Models  Cause and Effect	ESS1.A ESS1.B	RST.6-8.7; (RST.6-8.9); WHST.6-8.9
79 FIELD STUDY: The Predictable Moon Students predict the phase of the Moon based on the lunar cycle	MS-ESS1-1	Analyzing and Interpreting Data  Planning and Carrying Out Investigations	Patterns  Systems and System Models  Cause and Effect	(ESS1.A) (ESS1.B)	
80 MODELING: Explaining the Phases of the Moon Students investigate physical models of the phases of the Moon.	MS-ESS1-1	Developing and Using Models	Systems and System Models  Patterns  Cause and Effect	ESS1.A (ESS1.B)	MATH: (6.RP.A.1)
81 COMPUTER SIMULATION: Moon Phase Simulator Students investigate a computer simulation of the	MS-ESS1-1	Developing and Using Models	Systems and System Models	ESS1.A (ESS1.B)	

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Earth in Space</b>					
Moon's phases and connect it to the previous activities.			Scale, Proportion, and Quantity Cause and Effect		
82 INVESTIGATION: Tides and the Moon Students analyze the relationship between the Moon's phase and the occurrence of extreme tides.			Patterns Systems and System Models Cause and Effect	(ESS1.A)	MATH: MP.4; MP.2
83 TALKING IT OVER: Marking Time Students decide on the best calendar for different locations based on each community's needs in relation to the solar year and lunar cycle.		(Engaging in Argument from Evidence)			(WHST.6-8.2)
84 INVESTIGATION: Planets in Motion Students model and present the day length, year length, seasons, and tides of eight fictional planets.		Analyzing and Interpreting Data	Scale, Proportion, and Quantity	(ESS1.A)	(SL.8.5) MATH: (6.RP.A.1); (7.RP.A.2); 6.NS.C.5

Grade 6      Advisory 2

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Rocks and Minerals</b>					
12 INVESTIGATION: Observing Natural Resources Students examine and rank four natural resources from most to least valuable.		Analyzing and Interpreting Data  Planning and Carrying Out Investigations			
13 LABORATORY: Diamond Dilemma Students gather data on an unidentified mineral that appears to be a diamond.		Analyzing and Interpreting Data  Planning and Carrying Out Investigations			
14 PROBLEM SOLVING: Analyzing Diamond Data Students compare data on the unidentified mineral to that of four known materials and then identify the sample as fluorite.		Analyzing and Interpreting Data  Planning and Carrying Out Investigations			
15 READING: Mineral Properties A reading on minerals and their properties introduces the idea that rocks are made of minerals.			(Interdependence of Science, Engineering, and Technology)  (Influence of Engineering, Technology, and Science on Society and the Natural World)	(ESS3.A)	RST.6-8.1; RST.6-8.7
16 LABORATORY: Mineral Identification Students design an investigation to identify an unknown mineral.		Analyzing and Interpreting Data			

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Rocks and Minerals</b>					
		Constructing Explanations and Designing Solutions  Planning and Carrying Out Investigations			
17 LABORATORY : The Minerals in Rocks Students select and test a single property to determine whether the mineral found in two different rock samples is calcite or quartz.		Analyzing and Interpreting Data  Constructing Explanations and Designing Solutions  Planning and Carrying Out Investigations			
18 TALKING IT OVER: Every Rock Tells a Story Students analyze the content of a fictional newspaper story that describes the alleged discovery of diamonds in a national forest.		Analyzing and Interpreting Data  (Asking Questions and Defining Problems)			RST.6-8.1
19 READING: Rock Formation The formation of sedimentary, igneous, and metamorphic rocks is explained in the context of coal, kimberlite, and marble formation.	(MS-ESS2-1)		Energy and Matter		RST.6-8.1; WHST.6-8.9
20 LABORATORY : Identifying Rock Types Students observe and identify rocks as igneous, sedimentary, or metamorphic.		Constructing Explanations and Designing Solutions  Planning and Carrying Out Investigations			

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Rocks and Minerals</b>					
21 MODELING: Modeling Rock Layers Students model the formation of sedimentary rock layers by dropping plastic chips into a cylinder.	(MS-ESS1-4)	Developing and Using Models  Analyzing and Interpreting Data  Constructing Explanations and Designing Solutions  Planning and Carrying Out Investigations	(Systems and System Models)  Scale, Proportion, and Quantity	(ESS1.C)	
22 INVESTIGATION: The Rock Cycle Game Students play a game that models the rock cycle.	MS-ESS2-1	Developing and Using Models	Systems and System Models  Scale, Proportion, and Quantity  (Stability and Change)  Energy and Matter	(ESS2.A)	
23 TALKING IT OVER : Making Minerals Students evaluate data on mined vs. manufactured diamonds and discuss their relative values.		(Analyzing and Interpreting Data)  (Asking Questions and Defining Problems)	Interdependence of Science, Engineering, and Technology		

**Grade 6      Advisory 2 & 3**

<b>SEPUP Unit: Activity</b>	<b>Performance Expectation</b>	<b>Practices</b>	<b>Crosscutting Concepts</b>	<b>Disciplinary Core Ideas</b>	<b>Common Core ELA/Mathematics</b>
<b>Weather and Atmosphere</b>					
50 TALKING IT OVER : Weather Effects A fictional story focuses on how weather affects people’s plans and activities. Students are introduced to four kinds of careers related to the science of weather. They then examine maps that show the relative level of risk of different weather disasters.	MS-ESS2-6				
51 COMPUTER INVESTIGATION: Investigating Local Weather Students record and analyze five days of daily weather data. They then record and graph local monthly weather averages. They compare daily weather conditions to the monthly weather data.		Planning and Carrying Out Investigations  Analyzing and Interpreting Data	Patterns	(ESS2.C)	MATH: MP.2; (6.NS.C.5)
52 PROJECT: Local Weather History Students design and conduct a survey to learn about the history of weather disasters in the local area, and then compare the level of risk indicated by risk maps to local weather history.		Analyzing and Interpreting Data		(ESS2.C)	WHST:6-8.7  MATH: MP.2
53 PROBLEM SOLVING: Weather and Climate Students examine a climate map along with photos and descriptions of different climates. They identify their local climate as well as the climate for three different regions based on the climate graphs.	MS-ESS2-6	Constructing Explanations and Designing Solutions  Analyzing and Interpreting Data	Patterns	ESS2.C (ESS3.C)	MATH: (MP.4); MP.2; 6.NS.C.5
54 PROBLEM SOLVING: The Earth’s Surface Students use a gridded world map to estimate the amounts of earth’s surface covered by water and land. As a class, they calculate the mean, median, and mode of their estimates to help determine an “accepted value” for the class.	MS-ESS2-6	Constructing Explanations and Designing Solutions  Analyzing and Interpreting Data  Planning and		(ESS2.C) (ESS2.D)	MATH: MP.2; (6.RP.A.1); (7.RP.A.2)

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Weather and Atmosphere</b>					
		Carrying Out Investigations			
55 LABORATORY : Heating Earth Surfaces Students design an experiment to measure how the sun’s energy heats land and water, as well as how quickly both of those substances cool. An Anticipation Guide reinforces the idea that differences in heating and cooling of land and water are important factors in determining climate.	MS-ESS2-6	Developing and Using Models  Constructing Explanations and Designing Solutions  Planning and Carrying Out Investigations	Systems and System Models	(ESS2.C) (ESS2.D) (ESS3.C)	MATH: MP.2; 6.NS.C.5
56 PROBLEM SOLVING: Ocean Temperatures Students investigate the range of mean ocean surface temperatures around the globe. They map and discuss patterns of surface temperatures in particular regions of the oceans. The members of each small group then merge their findings and summarize global patterns.	MS-ESS2-6	Planning and Carrying Out Investigations  Analyzing and Interpreting Data	Systems and System Models  Energy and Matter  Patterns	ESS2.C ESS2.D	MATH: (MP.4); MP.2
57 ROLE PLAY: Oceans and Climate Students learn more about how oceans affect climate. They participate in a role-play that discusses the history of the identification of the Gulf Stream and how modern technology is used to gather ocean data.	MS-ESS2-6		(Interdependence of Science, Engineering, and Technology)  Energy and Matter  Cause and Effect	ESS2.C ESS2.D	RST.6-8.7; WHST.6-8.9
58 READING: The Causes of Climate Students read about more factors affecting climate, including the sun’s energy. A literacy strategy helps students comprehend the ideas presented in the text.	MS-ESS2-6	Constructing Explanations and Designing Solutions	Energy and Matter  Cause and Effect	ESS2.C ESS2.D	RST.6-8.1; RST.6-8.7; WHST.6-8.9
59 LABORATORY : Water as a Solvent Students compare the solubility of solids in three	MS-ESS2-4	Constructing Explanations and		(ESS2.C)	

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Weather and Atmosphere</b>					
different solvents. The concept of water as the universal solvent is introduced, which helps students grasp the idea that most of the water on earth contains dissolved salts.		Designing Solutions  Planning and Carrying Out Investigations			
60 READING: Changing States of Water Students are introduced to the different forms of water and how they change from one to another. Teacher model changes in states of water, including demonstrations of evaporation and condensation. The class discusses the relationship between the changing states of water and the water cycle.	MS-ESS2-4	Constructing Explanations and Designing Solutions	Energy and Matter	ESS2.C	RST.6-8.1; RST.6-8.7; WHST.6-8.9
61 LABORATORY: Investigating Groundwater Students investigate the ability of water to filter through gravel and sand. The concept of groundwater is introduced.	MS-ESS2-4	Analyzing and Interpreting Data  Constructing Explanations and Designing Solutions  Planning and Carrying Out Investigations	(Systems and System Models)	ESS2.C	
62 MODELING: Traveling on the Water Cycle Students simulate traveling with water molecules through the water cycle. After first choosing a starting point in the water cycle, students roll a number cube to determine where the water will go next. After making at least six stops, students write a story that describes traveling with their water.	MS-ESS2-4		Systems and System Models  Scale, Proportion, and Quantity  Energy and Matter  (Influence of Engineering, Technology, and	ESS2.C	(WHST.6-8.2)

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Weather and Atmosphere</b>					
			Science on Society and the Natural World)		
63 LABORATORY: Investigating Air Students explore the nature of air by making on air pressure and on the interaction of air and a chemical indicator. This gives them direct evidence that, although air can be invisible in their everyday experience, it is made up of gases that have distinct properties.		Constructing Explanations and Designing Solutions  Planning and Carrying Out Investigations		(ESS2.C)	
64 COMPUTER SIMULATION: Earth's Atmosphere Students use a computer simulation to sample air composition, temperature, and pressure at different altitudes above earth's surface. They take three samples within each atmospheric layer and calculate the average values. They then compare the properties of the different atmospheric layers.	MS-ESS2-5	Analyzing and Interpreting Data		(ESS2.C)	MATH: (6.RP.A.1); (7.RP.A.2)
65 INVESTIGATION: History of Earth's Atmosphere Students place in chronological order eight cards describing the history of earth's atmosphere. With these cards they examine the relative amounts of carbon dioxide and oxygen gases at different times in earth's history, and the role of living organisms in determining the composition of the atmosphere.		Analyzing and Interpreting Data  Constructing Explanations and Designing Solutions	Scale, Proportion, and Quantity  Stability and Change	(ESS2.C) (ESS3.D)	MATH: (6.RP.A.1); (7.RP.A.2)
66 READING: Atmosphere and Climate Students read about the relationship between earth's atmosphere and its weather and climate. A literacy strategy helps them comprehend the ideas presented in the text.	MS-ESS2-5		Energy and Matter  Stability and Change	ESS2.C ESS2.D (ESS3.D)	WHST.6-8.2; RST.6-8.1; WHST.6-8.9
67 LABORATORY: Measuring Wind Speed and Direction Students are introduced to the Beaufort wind	MS-ESS2-5	Analyzing and Interpreting Data	(Interdependence of Science, Engineering, and		

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Weather and Atmosphere</b>					
scale and its development. They work in groups to design, build, and test instruments for measuring wind speed and direction. After improving their instruments, they use them to collect wind data.		Planning and Carrying Out Investigations  Constructing Explanations and Designing Solutions	Technology)		
68 COMPUTER SIMULATION: Worldwide Wind Students use a computer simulation to identify the most common wind direction in a particular location. They share their data with the class and construct a map of global wind patterns.	MS-ESS2-5	Analyzing and Interpreting Data  Planning and Carrying Out Investigations	Systems and System Models  Patterns  Energy and Matter	ESS2.C	
69 INVESTIGATION: Forecasting Weather Students work together to interpret a weather map and construct a weather report. Each group then presents a weather report to the class. Students use this information to forecast the next day's weather.	MS-ESS2-5		Systems and System Models  Interdependence of Science, Engineering, and Technology  Cause and Effect  Stability and Change  Patterns	ESS2.D	
70 TALKING IT OVER: People and Weather Students analyze reports from a hydrologist, climatologist, atmospheric scientist, and meteorologist about the fictional town of Sunbeam City. They consider what role people play in affecting a region's weather and atmosphere.		Analyzing and Interpreting Data  Engaging in Argument from Evidence	Influence of Engineering, Technology, and Science on Society and the Natural World	ESS2.D	(SL.8.5); RST.6-8.1; RST.6-8.7; WHST.6-8.1  MATH: MP.2

63 READING: Show Me the Genes! Students read about the behavior of chromosomes and the function of DNA during sexual reproduction. [optional web based activity on Human Reproduction]	MS-LS3-1 MS-LS3-2		Cause and Effect  (Stability and Change)	LS1.B LS3.A LS3.B	WHST.6-8.7; RST.6-8.7
64 LABORATORY: Nature and Nurture Students design an experiment to investigate the effect of the environment on seedling color.	MS-LS1-5	Analyzing and Interpreting Data	Cause and Effect	LS1.B LS3.B LS4.B	MATH: MP.4; (6.RP.A.1); (7.RP.A.2)
65 INVESTIGATION: Breeding Critters—More Traits Students create imaginary critter offspring to model patterns of inheritance.	(MS-LS1-5) MS-LS3-2	Developing and Using Models	Cause and Effect	LS1.B LS3.B	(RST.6-8.4)  MATH: MP.4
66 PROBLEM-SOLVING: Patterns in Pedigrees Students use Punnett squares and pedigrees to analyze patterns of inheritance.	MS-LS3-2	Engaging in Argument from Evidence  Analyzing and Interpreting Data	Cause and Effect  Patterns	LS1.B LS3.B	(RST.6-8.4); WHST.6-8.9; (SL.8.1)
67 TALKING IT OVER: What Would You Do? Students re-visit the Marfan scenario from Activity 56 and discuss the trade-offs of genetic		Engaging in Argument from Evidence			WHST.6-8.9; (SL.8.1); (WHST.6-8.8); WHST.6-8.7

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Genetics</b>					
testing.					Math:(6.SP.B.5)
68 INVESTIGATION: Searching for the Lost Children After being introduced to a story about children lost during war, students apply blood group genetics to evaluating parent/child matches.			Cause and Effect	LS3.B	WHST.6-8.7; RST.6-8.7
69 MODELING: Evidence from DNA Students perform a DNA fingerprinting simulation to generate different-sized pieces of DNA.					(RST.6-8.4); (WHST.6-8.8); WHST.6-8.7
70 INVESTIGATION: Finding the Lost Children Students use DNA fingerprints to gather additional evidence about the lost children introduced in Activity 68.		Engaging in Argument from Evidence			WHST.6-8.1
71 TALKING IT OVER: Should We? Students learn about the work of Dr. Mary-Claire King, who helped families in Argentina find their lost children and explore the ethics of using genetic information.		Engaging in Argument from Evidence			(SL.8.1); (WHST.6-8.8); WHST.6-8.7

**Grade 7      Advisory 3**

<b>SEPUP Unit: Activity</b>	<b>Performance Expectation</b>	<b>Practices</b>	<b>Crosscutting Concepts</b>	<b>Disciplinary Core Ideas</b>	<b>Common Core ELA/Mathematics</b>
<b>Evolution</b>					
89 TALKING IT OVER: Here Today, Gone Tomorrow? After reading about extinct mammoths and modern elephants, students discuss whether efforts should be made to save endangered elephants.		Engaging in Argument from Evidence	Patterns	LS4.A	RST.6-8.1; (RST.6-8.2); WHST.6-8.2; WHST.6-8.7; (SL.8.1); RST.6-8.7
90 LABORATORY: Figuring Out Fossils Students examine eight different fossils as evidence for extinct species		Engaging in Argument from Evidence		LS4.A	
91 INVESTIGATION: Fossilized Footprints Students interpret a series of fossilized footprints, differentiating between observations and inferences		Engaging in Argument from Evidence  Analyzing and Interpreting Data		LS4.A	(SL.8.1)
92 MODELING: Time for Change Students develop a geologic-style personal time scale and then construct a geologic time scale.	MS-LS4-1			LS4.A	MATH: (6.RP.A.3)
93 INVESTIGATION: Reading the Rocks Students examine simulated drill cores in order to develop a stratigraphic column.	MS-LS4-1			LS4.A	
94 ROLE PLAY: A Meeting of Minds Students role-play an imaginary meeting between Charles Darwin and Jean-Baptiste Lamarck, who present and compare their theories on how evolution occurred..			Cause and Effect	LS4.B LS4.C	WHST.6-8.7; RST.6-8.7; WHST.6-8.9; RST.6-8.9
95 MODELING: Hiding in the Background Students use colored toothpicks to model the effect of environment and predation in the process of natural selection.	MS-LS4-4 MS-LS4-6	Developing and Using Models  Using Mathematics and Computational Thinking	Cause and Effect	LS4.B LS4.C	RST.6-8.9; WHST.6-8.9  MATH: (6.SP.B.5); MP.4; (6.RP.A.1); (7.RP.A.2)

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Evolution</b>					
96 MODELING: Battling Beaks Students simulate the effect of natural selection on an imaginary species of “forkbirds.”	MS-LS4-4 MS-LS4-6	Developing and Using Models  Using Mathematics and Computational Thinking  Analyzing and Interpreting Data	Cause and Effect	LS4.B LS4.C	MATH: (6.SP.B.4); (6.SP.B.5); MP.4; (6.RP.A.1); (7.RP.A.2); WHST.6-8.9; RST.6-8.9
97 READING: Origins of Species Students read about mutations and how they provide the genetic variation necessary for natural selection.	MS-LS4-4		Stability and Change	LS3.B (LS4.A) LS4.B LS4.C	RST.6-8.1; RST.6-8.7; WHST.6-8.2; WHST.6-8.9; WHST.6-8.7
98 INVESTIGATION: Family Histories Students draw and interpret graphs showing changes in the numbers of fossil families in the fish, reptile, and mammal classes over geological time.	MS-LS4-1 MS-LS4-6	Engaging in Argument from Evidence  Analyzing and Interpreting Data  Using Mathematics and Computational Thinking	Patterns	LS4.A	(SL.8.1)  MATH: (6.SP.B.4)
99 INVESTIGATION: A Whale of A Tale Students investigate anatomical evidence for evolution by comparing whale skeletons.	MS-LS4-1 MS-LS4-2	Engaging in Argument from Evidence	Patterns	LS4.A	
100 INVESTIGATION: DNA: The Evidence Within Students investigate how DNA sequences can provide evidence for evolution. [For Evolution UNIT only: Includes student activity in Teacher’s Guide to be done BEFORE activity]		Engaging in Argument from Evidence			
101 TALKING IT OVER: Birds of a Feather? After reading about the history of the dodo bird and the common pigeon, students discuss the	MS-LS4-5	Engaging in Argument from Evidence		LS4.B	RST.6-8.1; (RST.6-8.2); WHST.6-8.2; (SL.8.1)

<b>Energy</b>					
			System Models)		
61 LABORATORY: Mixing Hot and Cool Water Students mix different temperatures and volumes of water in order to analyze the heat transfer that occurs.	MS-PS3-4	Analyzing and Interpreting Data  (Planning and Carrying Out Investigations)	Energy and Matter  (Scale, Proportion, and Quantity)	PS3.A PS3.B	RST.6-8.7; RST.6-8.3  MATH: MP.2; MP.4; 6.SP.B.5; 6.NS.C.5; 6.RP.A.1; 7.RP.A.2
62 INVESTIGATION: Quantifying Energy Students measure temperature differences with a calorimeter and calculate the energy transferred from ice to water during melting.	MS-PS3-4	Analyzing and Interpreting Data  Planning and Carrying Out Investigations  Using Mathematics and Computational Thinking	Energy and Matter  (Scale, Proportion, and Quantity)	PS3.A PS3.B	RST.6-8.3  MATH: MP.2; MP.4; (6.EE.A.2)
63 LABORATORY: Measuring Calories Students use a calorimeter to measure the stored energy in a nut. They use the data to calculate the Calories in the nut.	MS-PS3-4	Analyzing and Interpreting Data  Planning and Carrying Out Investigations  Using Mathematics and Computational Thinking	(Cause and Effect)  Energy and Matter  (Scale, Proportion, and Quantity)	PS1.B PS3.A PS3.B ETS1.C	RST.6-8.3  MATH: MP.2; MP.4; 6.RP.A.3; 6.SP.B.5; (6.EE.A.2)
64 READING: Electricity Generation Students investigate the sources of electricity in the United States. They read about renewable and non-renewable sources and discuss the trade-offs of different electricity generation methods.		Engaging in Argument from Evidence	(Structure and Function)  Interdependence of Science, Engineering, and Technology	PS3.B	RST.6-8.1; RST.6-8.2; WHST.6-8.9  MATH: MP.2; MP.4; 6.RP.A.3; 6.SP.B.5; 6.RP.A.1; 7.RP.A.2

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Energy</b>					
			(Influence of Engineering, Technology, and Science on Society and the Natural World) (Energy and Matter)		
65 LABORATORY: Electrochemical Batteries Students build a wet cell to explore how different metals react to produce electrical energy. A small motor is used to detect the amount of energy the different reactions produce.		Developing and Using Models Analyzing and Interpreting Data (Planning and Carrying Out Investigations) Asking Questions and Defining Problems	(Cause and Effect) (Energy and Matter)		RST.6-8.3; WHST.6-8.9  MATH: 6.NS.C.5
65A LABORATORY: Energy and Magnetic Fields Students investigate magnetic fields using a plotting compass. They also read about some of the properties of fields and electromagnets.	(MS-PS2-5)		Energy and Matter	PS2.B	RST.6-8.3
66 INVESTIGATION: Connecting Circuits Students build simple circuits that transform electrical energy into light, sound, and mechanical energy. They test various materials for conductivity and explore series and parallel circuits.		Analyzing and Interpreting Data  Planning and Carrying Out Investigations	(Energy and Matter)		RST.6-8.3  MATH: 6.NS.C.5
67 LABORATORY: Hot Bulbs Students calculate the efficiency of a flashlight	(MS-PS3-4)	Analyzing and Interpreting Data	(Cause and Effect)	PS3.A PS3.B	RST.6-8.3

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Energy</b>					
bulb in producing light by measuring how much energy is “wasted” as thermal energy.		Planning and Carrying Out Investigations  Using Mathematics and Computational Thinking	(Energy and Matter)  Scale, Proportion, and Quantity		MATH: MP.2; MP.4; 6.RP.A.3; 6.SP.B.5; (6.EE.A.2); (7.EE.B.3); (7.EE.B.4); 6.RP.A.1; 7.RP.A.2
68 LABORATORY: Photovoltaic Cells Students experiment with photovoltaic cells as they explore the sunlight– electricity energy transformation		Analyzing and Interpreting Data  (Planning and Carrying Out Investigations)  Asking Questions and Defining Problems	Cause and Effect  (Energy and Matter)	PS3.B	RST.6-8.3
69 LABORATORY: Solar Heating Students continue their exploration of solar energy by investigating a model solar heat collector and calculating its efficiency.	(MS-PS3-3)	Analyzing and Interpreting Data  Constructing Explanations and Designing Solutions  Planning and Carrying Out Investigations  Using Mathematics and Computational Thinking	Structure and Function  Energy and Matter	PS3.B ETS1.A ETS1.B ETS1.C	RST.6-8.3  MATH: MP.2; (6.SP.B.4); (6.EE.A.2); (7.EE.B.3); (7.EE.B.4); 6.RP.A.1; 7.RP.A.2
70 MODELING: Collecting Solar Energy Students build and compare two boxes; one to absorb as much sunlight as possible and the other	MS-PS3-3	Developing and Using Models	Structure and Function	PS3.A ETS1.A ETS1.C	RST.6-8.3; (WHST.6-8.8); (WHST.6-8.7); (WHST.6-8.9)

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Energy</b>					
one to absorb as little sunlight as possible.		Constructing Explanations and Designing Solutions	(Energy and Matter)		
71 READING: Household Energy Efficiency Students read about home energy use, ways to improve energy efficiency and methods of conserving energy.		Engaging in Argument from Evidence	Structure and Function  Interdependence of Science, Engineering, and Technology	PS3.A PS3.B	(RST.6-8.1); WHST.6-8.1; WHST.6-8.9
72 INVESTIGATION: Improving Household Efficiency Students are presented with fictional scenarios of families who want to reduce their home energy cost. Using their knowledge of energy concepts, they conduct an economic analysis and make energy-saving recommendations that meet the needs of the family.		(Engaging in Argument from Evidence)	Structure and Function  (Influence of Engineering, Technology, and Science on Society and the Natural World)	PS3.A PS3.B	RST.6-8.7; (WHST.6-8.8); (WHST.6-8.7); WHST.6-8.1; (WHST.6-8.9)  MATH: MP.2; MP.4; (7.EE.B.3); (7.EE.B.4)

Grade 8      Advisory 2

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Force and Motion</b>					
73 TALKING IT OVER: Choosing a Safe Vehicle Students compare the specifications of two vehicles in order to choose the one they feel is safe.		(Engaging in Argument from Evidence)	(Structure and Function)  (Interdependence of Science, Engineering, and Technology)		
74 LABORATORY: Measuring Speed Students use a cart, ramp, and track to calculate speed from distance and time measurements. Then students design an investigation that examines the effect of height of the ramp on the speed of the cart.		Analyzing and Interpreting Data  Asking Questions and Defining Problems  Planning and Carrying Out Investigations  Engaging in Argument from Evidence  Using Mathematics and Computational Thinking	Scale, Proportion, and Quantity	PS2.A	RST.6-8.3  MATH: MP.2; MP.4; 6.RP.A.3; 6.SP.B.5; (6.EE.A.2); 6.RP.A.1; (6.RP.A.2); 7.RP.A.2
75 INVESTIGATION: Interpreting Motion Graphs Students construct and interpret distance vs time graphs by matching a narrative to graph segments.		Analyzing and Interpreting Data	Patterns	PS2.A	RST.6-8.7  MATH: MP.2; 6.RP.A.3; (6.SP.B.4); 6.NS.C.5; 6.RP.A.1; (6.RP.A.2); 7.RP.A.2
76 LABORATORY: Speed and Collisions To investigate the effect of vehicle speed on the		Analyzing and Interpreting Data	Cause and Effect	PS2.A PS3.C	RST.6-8.3

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Force and Motion</b>					
severity of accidents, students use the ramp and cart to simulate vehicle collisions at different speeds.		(Engaging in Argument from Evidence)  Planning and Carrying Out Investigations  Using Mathematics and Computational Thinking			MATH: MP.2; 6.SP.B.5; 6.RP.A.1; (6.RP.A.2); 7.RP.A.2
77 LABORATORY: Mass and Collisions Students design and carry out investigations to discover the effect of mass on the severity of accidents.		Analyzing and Interpreting Data  Asking Questions and Defining Problems	Cause and Effect	PS2.A	RST.6-8.3  MATH: MP.2; MP.4; 6.RP.A.3; 6.SP.B.5; 6.RP.A.1; (6.RP.A.2); 7.RP.A.2
78 PROBLEM SOLVING: Force, Acceleration, and Mass Students analyze data and investigate the relationship between force, mass, and acceleration.		Analyzing and Interpreting Data  Using Mathematics and Computational Thinking	Cause and Effect  Scale, Proportion, and Quantity  Patterns	PS2.A	RST.6-8.3; (RST.6-8.9)  MATH: MP.2; MP.4; (6.SP.B.4); (6.EE.A.2)
79 LABORATORY: Inertia around a Curve Students first observe a marble moving around a circular track and then predict the path taken by the marble once a section of the track is removed.		Analyzing and Interpreting Data  Planning and Carrying Out Investigations	Cause and Effect	PS2.A	RST.6-8.3
80 READING: Laws of Motion Students read about Newton’s discoveries of the fundamental relationships between forces, including Newton’s three laws and friction.			Scale, Proportion, and Quantity	PS2.A	RST.6-8.1; (RST.6-8.9); WHST.6-8.9  MATH: MP.2; MP.4;

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Force and Motion</b>					
					6.RP.A.3; (6.EE.A.2); 6.RP.A.1; 7.RP.A.2
81 LABORATORY: The Net Force Challenge Students use force meters to investigate the effect of more than one force on a block.		Analyzing and Interpreting Data  Planning and Carrying Out Investigations	Cause and Effect  (Stability and Change)	PS2.A	RST.6-8.3; (RST.6-8.9)  MATH: MP.2; (MP.4); 6.RP.A.3; 6.NS.C.5; 6.RP.A.1; 7.RP.A.2
82 LABORATORY: Braking Distance To simulate the effect of speed on braking distance, students measure the distance that carts travel after encountering a high friction surface.		Analyzing and Interpreting Data  Planning and Carrying Out Investigations  Using Mathematics and Computational Thinking	Cause and Effect  (Stability and Change)  Scale, Proportion, and Quantity	PS2.A	RST.6-8.3  MATH: MP.2; MP.4; 6.SP.B.5
83 INVESTIGATION: Coming to a Stop Students learn about stopping distance and then investigate further by calculating and graphing data for different road and driver conditions.		Engaging in Argument from Evidence  Analyzing and Interpreting Data  Using Mathematics and Computational Thinking	Cause and Effect  (Stability and Change)  Patterns	PS2.A	RST.6-8.3  MATH: MP.2; MP.4; (6.SP.B.4); (6.EE.A.2); (7.EE.B.3)
84 READING: Decelerating Safely Students learn about vehicle safety features that decelerate the body more slowly than it would ordinarily experience in an accident.		Engaging in Argument from Evidence	(Interdependence of Science, Engineering, and Technology)  (Cause and Effect)	PS2.A	RST.6-8.7; RST.6-8.1; RST.6-8.2; WHST.6-8.9  MATH: MP.2; (6.EE.A.2)

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>Force and Motion</b>					
			(Stability and Change)		
85 INVESTIGATION: Crash Testing Students design and present the specifications for a crash test dummy. They weigh the advantages and disadvantages of using different sized dummies.	(MS-PS2-1)	Constructing Explanations and Designing Solutions  (Engaging in Argument from Evidence)	Structure and Function  (Interdependence of Science, Engineering, and Technology)  Systems and System Models	ETS1.A ETS1.C	SL.8.5
86 MODELING: Investigating Center of Mass Students compare the stability of carts with different center-of masses as they collide with a stationary barrier.		Analyzing and Interpreting Data  Planning and Carrying Out Investigations	Cause and Effect  (Stability and Change)		RST.6-8.3  MATH: MP.2
87 INVESTIGATION: Fatal Accidents Students investigate types of car accidents and fatality rates by analyzing actual accident data.		Analyzing and Interpreting Data			MATH: MP.2; 6.SP.B.5
88 ROLE PLAY: Safety for All Students recommend a solution to the problem of increased injuries and damage related to vehicle incompatibility during collisions		(Engaging in Argument from Evidence)  Obtaining, Evaluating, and Communicating Information			(RST.6-8.1); WHST.6-8.1

**Grade 8      Advisory 3**

SEPUP Unit: Activity	Performance Expectation	Practices	Crosscutting Concepts	Disciplinary Core Ideas	Common Core ELA/Mathematics
<b>The Chemistry of Materials</b>					
<p>12 INVESTIGATION: Evaluating Materials Students compare aluminum, glass, and plastic in order to choose the best material for soft drink containers.</p>		<p>Analyzing and Interpreting Data</p> <p>Engaging in Argument from Evidence</p>	<p>(Structure and Function)</p> <p>Interdependence of Science, Engineering, and Technology</p> <p>Cause and Effect</p> <p>Patterns</p>		<p>(RST.6-8.1); RST.6-8.3; WHST.6-8.1</p> <p>MATH: MP.2; MP.4; (6.SP.B.4)</p>
<p>13 READING: Product Life Cycle Students construct a life cycle diagram after reading about the life cycle of glass, metal, and plastic drink containers.</p>	MS-PS1-3		<p>(Structure and Function)</p> <p>Interdependence of Science, Engineering, and Technology</p> <p>Cause and Effect</p>		<p>RST.6-8.7; RST.6-8.1; (WHST.6-8.8); (WHST.6-8.7); (SL.8.5); (WHST.6-8.9)</p>
<p>14 LABORATORY: Physical and Chemical Properties of Materials Students test and group 6 different materials based on their chemical and physical properties.</p>	MS-PS1-2	<p>Planning and Carrying Out Investigations</p>	<p>(Structure and Function)</p>	PS1.A	RST.6-8.3
<p>15 INVESTIGATION: Families of Elements Students group elements based on chemical and physical properties and then analyze families of elements as historically defined by scientists.</p>		<p>(Developing and Using Models)</p>	<p>Patterns</p>	PS1.A	<p>RST.6-8.3</p> <p>MATH: MP.2; (6.SP.B.4)</p>
<p>16 READING: Elements and the Periodic Table Students read about elements, their combination in compounds, and the historical development of the Periodic Table.</p>			<p>(Scale, Proportion, and Quantity)</p> <p>Patterns</p>	PS1.A	<p>(RST.6-8.7); RST.6-8.1</p> <p>MATH: 6.RP.A.3; 6.RP.A.1; 7.RP.A.2</p>

24 LABORATORY: Diluting the Problem Students explore one method of treating used copper chloride from circuit board production: dilution. They then determine the concentration of copper in the used copper chloride waste solution.		(Planning and Carrying Out Investigations)	(Scale, Proportion, and Quantity)		RST.6-8.3  MATH: MP.2; MP.4; 6.RP.A.3; 6.SP.B.5; (7.EE.B.3); 6.RP.A.1; 7.RP.A.2
25 LABORATORY: Conservation of Mass Students conduct two chemical reactions in closed containers in order to compare mass before and after a chemical reaction has taken place. They compare the change in mass to the same reactions in open containers, and use this data to support the Law of Conservation of Mass.	MS-PS1-2 MS-PS1-5	(Planning and Carrying Out Investigations)  Using Mathematics and Computational Thinking	(Scale, Proportion, and Quantity)  Energy and Matter	PS1.B	RST.6-8.3  MATH: MP.2; 6.SP.B.5
26 LABORATORY: Incinerating the Waste Simulated metal waste is burned, and students test the resulting smoke and ash for the presence of potential toxic metals.			(Energy and Matter)		RST.6-8.3
27 LABORATORY: Reclaiming the Metal Students investigate the use of three metal replacement reactions to extract copper from the used copper chloride solution.	MS-PS1-2	Planning and Carrying Out Investigations  (Engaging in Argument from Evidence)	(Energy and Matter)	PS1.B	RST.6-8.3; (SL.8.5)  MATH: MP.2; 6.RP.A.1; 7.RP.A.2
28 LABORATORY: Another Approach to Metal Reclamation Students precipitate copper compounds from used copper chloride and then decide upon a disposal method for the waste copper chloride solution.	MS-PS1-2	(Engaging in Argument from Evidence)		PS1.B	RST.6-8.3; WHST.6-8.1  MATH: MP.2

<b>Waves</b>					
<p>89 INVESTIGATION: It's a Noisy World This activity introduces sound intensity and the decibel scale. Students examine cards that represent the relative intensity of various sounds and learn that an increase of 10 dB is equivalent to a 10-fold increase in sound intensity.</p>		Using Mathematics and Computational Thinking	Scale, Proportion, and Quantity		<p>RST.6-8.3</p> <p>MATH: MP.2; MP.4; 6.RP.A.3; (8.EE.A.3); 6.RP.A.1; 7.RP.A.2</p>
<p>90 LABORATORY: The Frequency of Sound Students make a pendulum to create a wave in yarn attached to the bottom of the pendulum. By varying the length of the pendulum, students change the frequency of the wave. They measure the wavelength associated with each frequency.</p>	(MS-PS4-1)	<p>Analyzing and Interpreting Data</p> <p>Planning and Carrying Out Investigations</p> <p>Using Mathematics and Computational Thinking</p>	<p>Scale, Proportion, and Quantity</p> <p>Patterns</p>	PS4.A	<p>(RST.6-8.9)</p> <p>MATH: MP.2; MP.4; 6.SP.B.5; (6.EE.A.2); 6.RP.A.1; 7.RP.A.2</p>
<p>91 LABORATORY: Longitudinal and Transverse Waves Using a long metal spring, students investigate transverse and longitudinal waves. They investigate such properties of the waves as wavelength and amplitude.</p>		Planning and Carrying Out Investigations		PS4.A	RST.6-8.3; (RST.6-8.9)
<p>92 INVESTIGATION: Noise-Induced Hearing Loss Students are introduced to the concept of noise-induced hearing loss. They analyze fictitious profiles and develop a list of strategies to reduce the risk of noise-induced hearing loss.</p>			Cause and Effect		MATH: MP.2; MP.4; (6.SP.B.4)
<p>93 READING: The Nature of Waves Students read about the properties of two major kinds of waves, sound and light. The nature of these waves, the role of media in their propagation, and their speed in various media are</p>	(MS-PS4-2)		<p>Scale, Proportion, and Quantity</p> <p>(Influence of Engineering,</p>	PS4.A PS4.B	<p>RST.6-8.7; RST.6-8.1; (RST.6-8.9); WHST.6-8.9</p> <p>MATH: MP.2</p>

<b>Waves</b>					
described.			Technology, and Science on Society and the Natural World)		
94 LABORATORY: Comparing Colors Students explore of light by investigating the colors of the visible spectrum. Students first observe how a diffraction grating splits white light into its component colors. Then they investigate the frequency of the different colors of white light through the use of a phosphorescent material.		Engaging in Argument from Evidence  Planning and Carrying Out Investigations		PS4.B	RST.6-8.3  MATH: MP.2; MP.4
95 LABORATORY: Selective Transmission Students learn more about the properties of light by investigating transmission, absorption, and reflection of waves outside the visible spectrum. Students investigate how three thin films, which all transmit visible light, selectively transmit waves that are not visible, such as ultraviolet.	(MS-PS4-2)	Analyzing and Interpreting Data  Engaging in Argument from Evidence  Planning and Carrying Out Investigations		PS4.B	RST.6-8.3  MATH: MP.2; MP.4; 6.SP.B.5
96 READING: The Electromagnetic Spectrum Students read about the kinds of electromagnetic energies emitted from the sun that are not visible. They refer to their knowledge of frequency, wavelength, and energy levels to learn about the discovery and applications of infrared energy and ultraviolet.			Scale, Proportion, and Quantity  Influence of Engineering, Technology, and Science on Society and the Natural World  Scale, Proportion, and Quantity	PS4.B	RST.6-8.1; WHST.6-8.9

<b>Waves</b>					
			(Energy and Matter)		
97 LABORATORY: Reflection and Absorption Students compare the reflection and absorption of sunlight off a dark surface and reflective surface. Then they consider the increased health risks due to sunlight that is reflected onto the skin and eyes from sand, snow, or water.	(MS-PS4-2)	Analyzing and Interpreting Data  Planning and Carrying Out Investigations	Cause and Effect	PS4.B	RST.6-8.3  MATH: MP.2; 6.SP.B.5
98 LABORATORY: Blocking Out Ultraviolet Students design an experiment that compares the effects of sunblock lotion and moisturizing lotion for their ability to transmit, reflect or absorb ultraviolet. They relate the results to the sun's effects on human health and actual use of sunscreens.		Analyzing and Interpreting Data  Planning and Carrying Out Investigations			RST.6-8.3  MATH: 6.SP.B.5
99 TALKING IT OVER: Personal Protection Plan Students analyze a series of fictitious profiles to determine the relative risk of cataracts and skin cancer for each case. After analyzing these narratives, each student determines his or her own relative exposure risk from ultraviolet, and then creates a personal protection plan.		(Engaging in Argument from Evidence)	Cause and Effect		WHST.6-8.1  MATH: MP.2
