

Lab-Aids Correlations for
COLORADO SCIENCE STANDARDS MIDDLE SCHOOL LEVEL
GRADES 6-8

Mark Koker, Ph D, Director of Curriculum & Professional Development, LAB-AIDS
Din Seaver and Lisa Kelp, Curriculum Specialists, LAB-AIDS

This document is intended to show how the SEPUP 3rd edition materials align with the 2019-20 *Colorado Middle Level Science Standards*¹.

ABOUT THE COLORADO SCIENCE STANDARDS

The Colorado Academic Standards in science represent what all Colorado students should know and be able to do in science as a result of their preschool through twelfth-grade science education. Specific expectations are given for students who complete each grade from preschool through eighth grade and for high school. These standards outline the essential level of science content knowledge and the application of the skills needed by all Colorado citizens to participate productively in our increasingly global, information-driven society.

ABOUT OUR PROGRAMS

Lab-Aids has maintained its home offices and operations in Ronkonkoma, NY, since 1963. We publish over 200 kits and core curriculum programs to support science teaching and learning, grades 6-12. All core curricula support an inquiry-driven pedagogy, with support for literacy skill development and with assessment programs that clearly show what students know and are able to do as a result of program use. All programs have extensive support for technology and

feature comprehensive teacher support. For more information please visit www.lab-aids.com .

SEPUP

Materials from the Science Education for Public Understanding Program (SEPUP) are developed at the Lawrence Hall of Science, at the University of California, Berkeley, and distributed nationally by LAB- AIDS, Inc. Since 1987, development of SEPUP materials has been supported by grants from the National Science Foundation and other public and private sources. SEPUP programs include student books, equipment kits, teacher materials, and online digital content, and are available as full year courses, or separately, as 17 units, each taking 3-8 weeks to complete, as listed below.

Middle Level, Grades 6-8

Earth Science	Life Science	Physical Science
Earth’s Resources	Biomedical Engineering	Chemistry of Materials
Geological Processes	Body Systems	Chemical Reactions
Land, Water, and Human Interactions	Ecology	Energy
Solar System and Beyond	From Cells to Organisms	Force and Motion
Weather and Climate	Evolution	Fields and Interactions
	Reproduction	Waves

STANDARD 1. PHYSICAL SCIENCE						
1. Students can use the full range of science and engineering practices to make sense of natural phenomena and solve problems that require understanding structure, properties and interactions of matter.	1. The fact that matter is composed of atoms and molecules can be used to explain the properties of substances, diversity of materials, states of matter and phases changes.	MS-PS1-1	Develop a model	Scale, proportion, quantity	<i>Chemistry of Materials: 2, 6, 7, 12*</i>	
		MS-PS1-2	Analyze and interpret data	Patterns	<i>Chemical Reactions: 1, 2, 3, 4, 5*</i>	
		MS-PS1-3	Gather, read, and synthesize information	Structure & function	<i>Chemistry of Materials: 1, 2, 3, 4, 5, 11, 12, 13*</i>	
		MS-PS1-4	Connections to NOS	Interdependence of SET	<i>Chemistry of Materials: 8, 9, 10</i>	
	2. Reacting substances rearrange to form different molecules, but the number of atoms is conserved. Some reactions release energy and others absorb energy.	MS-PS1-2	Develop a model	Energy and matter	<i>Chemical Reactions: 1, 2, 3, 4, 5*</i>	
		MS-PS1-5	Undertake a design project		<i>Chemical Reactions: 1, 2, 3, 4, 5, 6, 7*</i>
