

CONTENTS

Mathematical Goals	xvii
Looking Ahead	xviii
Investigation 1. Exponential Growth Patterns	1
Problem 1.1 Making Ballots: Linear or Nonlinear Relationship?	2
Problem 1.2 The King's Reward: Representing Exponential Functions	4
Problem 1.3 Killer Plant Strikes Lake Victoria: y-Intercepts Other Than 1	8
Problem 1.4 Growing Mold: Interpreting Equations for Exponential Functions	12
Mathematical Reflection	14
Applications—Connections—Extensions (ACE)	15
Investigation 2. Growth Factors and Growth Rates	29
Problem 2.1 Reproducing Rabbits: Fractional Growth Rates	30
Problem 2.2 Investing in the Future: Growth Rates	32
Problem 2.3 Making a Difference: Connecting Initial Values to Growth Factors	35
Mathematical Reflection	37
Applications—Connections—Extensions (ACE)	38
Investigation 3. Exponential Decay	47
Problem 3.1 Making Smaller Ballots: Introducing Exponential Decay	48
Problem 3.2 Fighting Fleas: Representing Exponential Decay	50

Problem 3.3 Cooling Water Experiment: Modeling Exponential Decay.....	52
Problem 3.4 Wrapping Up: Exponential Functions	55
Mathematical Reflection.....	58
Applications—Connections—Extensions (ACE).....	59
Investigation 4. Patterns with Exponents	71
Problem 4.1 Looking for Patterns Among Exponents	72
Problem 4.2 More Patterns: Properties of Exponents.....	75
Problem 4.3 Water Usage: Operations with Scientific Notation	78
Problem 4.4 Growing Amoebas: Extending the Properties of Exponents.....	83
Mathematical Reflection.....	86
Applications—Connections—Extensions (ACE).....	87
English/Spanish Glossary	95
Index.....	101
